

1. If someone came to you with a proposal to build a new piece of public infrastructure in our city, how would you evaluate whether the project was worth implementing? **First off I don't believe I would be qualified enough to be making a decision such as this. However I would bring it to council and have it looked at by planning and other members of council to see if it was in fact a viable project.**
2. Brockville needs to get on track financially while at the same time needs to move strategically to improve its offer to its citizens and tourists. What experience do you bring to the table that demonstrates your leadership in fiscal responsibility as well as strategic success? **I have been a very active volunteer in our community and held various leadership positions within those activities. I sit on the executive of minor hockey and have had to work within a team setting to help keep costs to a minimum. I have been the chair for Relay for life as well as a team member for about 8 yrs. As a community we raised 100's of thousand dollars to fight cancer. I am currently vice chair for parent council at Toniata public school and work collectively with council to do fund raising for various activities throughout the school year.**
3. How do we attract and retain Young Professional in Brockville? **I believe we need to look into start ups in the high tech world and draw people to bring their knowledge and expertise with them. If young people can make a decent salary they will want to stay and spend their dollars here.**
4. What are your 3 main priorities for Economic development and what key steps will you take to bring your vision to a reality.

5. What actions would you take to improve public safety in Brockville? In light of everything in the media, Brockville is safe. Can it be safer? Of course it can, how do we do that? Stronger police presence in areas of concern. Like parks and corridors of main streets. I think the curfew bylaw needs to be enforced to set a tone that loitering will not be tolerated. I also think that the new council should relook at the possibility of CCTV in major intersections and park.
6. Currently the city doesn't have Communication Policy – what are your thoughts to insure there is an effective external and internal communication policy in place. I feel that it should be up to the new council to devise a new strategy to iron out what would be beneficial to all of those involved. Communication is huge and we all communicate on different levels so it would take some great work to devise an effective policy but I truly believe it can be done.
7. What projects / policies would you champion to help small businesses grow? To be quite honest... I am not an expert on small business and don't necessarily think small business is in any major trouble. Most of the people I have talked to in small business seem to be doing quite well. I think if we worked at promoting tourism we would help these small businesses flourish.
